

# **HOTBOX**...

The Industry Leader in  
Valve Enclosures for Over 20 Years.

## **POLYEZ**™

Lightweight, functional and low cost. This "drop over" irrigation product comes with or without insulation and heat and is available in either green or beige.

## **POLYROK**®

Lightweight, functional and aesthetically pleasing. With or without insulation and heat, the POLYROK hides and protects your valve while enhancing the landscape.

## **VALVEGUARD**®

Simply a **HOTBOX**® without the insulation or heat - same quality, same size and same reliability. For use in non-freezing climates or where the valves or pumps are "winterized".

 ASSE 1060 Certified

Twenty years ago, our **HOTBOX** enclosure spawned a whole new industry. Today, we're still the pipe, valve and pump protection product that designers, distributors and contractors call for by name. We have the industry's broadest line of products, most of which have been ASSE certified, and we sell more enclosures than anyone else. Talk to our sales or engineering specialists today to see which design will be best for your climate and application.
