

HOTBOX[®]

Accept no substitutes.

POLYEZ[™]

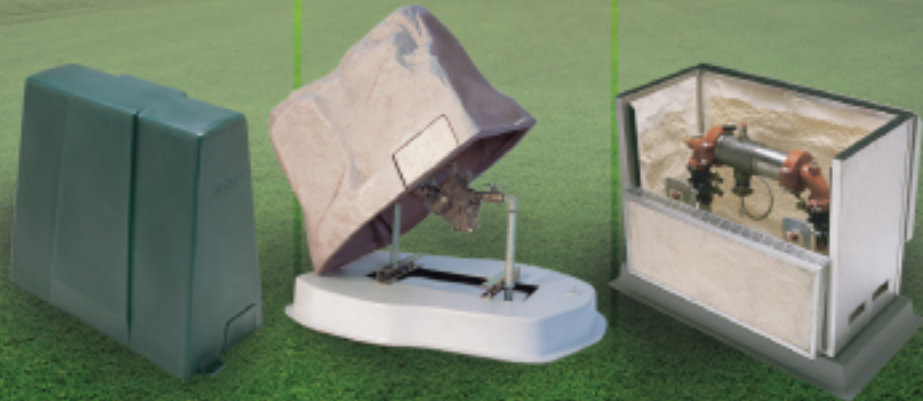

Lightweight, functional and low cost. This "drop over" irrigation product comes with or without insulation and heat and is available in either green or beige.

POLYROK[®]

Lightweight, functional and aesthetically pleasing. With or without insulation and heat, the POLYROK hides and protects your valve while enhancing the landscape.

DURAFOLD[™]

Arrives flat at the job site. Hinged walls, back, front and roof provide for quick installation—requiring only 4 machine bolts! The hinged front and roof provide instant unobstructed access for equipment testing and maintenance after installation.

Twenty years ago, our HOTBOX enclosure spawned a whole new industry. Today, we're still the pipe, valve and pump protection product that designers, distributors, and contractors call for by name. We have the industry's broadest line of products, most of which have been ASSE certified; and we sell more enclosures than anyone else. Talk to our sales or engineering specialists today to see which design will be best for your climate and application.
